🚗 Car Asset Pack for Arcade & Demolition Racing Games – URP Ready

Kickstart your racing or demolition game with this high-performance **Car Asset Pack**, built specifically for Unity's Universal Render Pipeline (URP). This pack includes **10 stylized, low-poly car models** optimized for both arcade racers and chaotic demolition gameplay — ideal for single or multiplayer racing environments.

Designed with performance and visual clarity in mind, these vehicles balance clean geometry with crisp PBR texturing. Whether you're building for mobile or PC, top-down arcade or cinematic cutscenes, this pack is modular, ready-to-use, and game-tested.

🎮 Features

- 🚘 **10 Stylized Car Models** – Includes a variety of race-ready and destruction-capable vehicles
- ⚙️ **Game-Optimized Assets** – Balanced triangle counts and clean topology for smooth gameplay
- 💡 **URP Compatibility** – Built for Unity's Universal Render Pipeline with support for dynamic lighting
- 🎨 **High-Quality PBR Textures** – 512–4096px resolution maps with metallic, normal, and albedo support
- 📦 **Modular Prefabs** – Quickly drop vehicles into your scenes and customize as needed
- 🔥 **Ideal for Arcade, Demolition & Combat Racing** – Ready for simulation, arcade, or stunt-based

---

🔧 Technical Details

- **Number of textures:** 16
- **Texture dimensions:** 512x512 to 4096x4096
- **Polygon count:** 87,289
- **Minimum polygon count:** 9,000
- **Maximum polygon count:** 11,000
- **Number of meshes/prefabs:** 10
- **Rigging:** No

- **Animation count:** 0
- **Animation type list:** N/A
- **UV mapping:** Yes
- **LOD information:** N/A
- **Material & Map Types:** PBR
- **Render Pipeline:** Universal Render Pipeline (URP)
- **Unity Versions Supported:** 2019.4 – 6.x
- **Platforms Supported:** Windows, macOS, Android, iOS
